## SUMMARY

---

Full Stack Development student with hands-on experience building scalable web applications using modern technologies. Proficient in frontend development with HTML, CSS, JavaScript, and Bootstrap, with advancing skills in React.js and backend technologies. Strong foundation in data structures and algorithms using C++. Committed to writing clean, maintainable code and engineering best practices. Active learner sharing daily progress on LinkedIn and GitHub.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, C++, HTML5, CSS3

**Frontend Technologies:** React.js, Bootstrap, Tailwind CSS, Responsive Web Design

**Backend Technologies:** Node.js, Express.js, MongoDB (in progress)

**Core Competencies:** Data Structures & Algorithms, Code Refactoring, Clean Code Practices, E-learning Modules

**Tools & Practices:** Git, GitHub, Code Reviews, Pair Programming, Agile Development

## EXPERIENCE

---

### Full Stack Development Student

2024 – Present

*Red & White Skill Education*

*Navsari, Gujarat*

- Completed intensive training in HTML, CSS, JavaScript, Bootstrap, and C++ DSA through hands-on project-based learning
- Currently advancing through React.js, Node.js, Express.js, and MongoDB in a structured full-stack curriculum
- Built multiple frontend projects demonstrating responsive design, DOM manipulation, and modern JavaScript features
- Implemented data structures and algorithms in C++, solving 50+ problems focusing on arrays, linked lists, stacks, and trees
- Actively document daily learning journey on LinkedIn and GitHub, maintaining consistent progress tracking and code repositories
- Collaborate with peers on code reviews and pair programming sessions to improve code quality, readability, and adherence to best practices
- Developed strong problem-solving skills through systematic debugging and refactoring exercises

## PROJECTS

---

### Responsive Portfolio Website | *HTML, CSS, JavaScript, Bootstrap*

2024

- Designed and developed a fully responsive personal portfolio showcasing projects and skills using Bootstrap framework
- Implemented smooth scrolling, dynamic content loading, and cross-browser compatibility
- Optimized website performance achieving 95+ Lighthouse scores for accessibility and best practices

### Interactive Web Application | *JavaScript, DOM Manipulation, CSS3*

2024

- Built interactive web application featuring dynamic user interface with real-time data updates
- Implemented event handling, form validation, and local storage for data persistence
- Applied clean code principles including modular functions, semantic naming, and comprehensive commenting

### Data Structures Implementation | *C++, Algorithms, Problem Solving*

2024

- Implemented fundamental data structures from scratch including linked lists, stacks, queues, and binary trees
- Solved algorithmic challenges focusing on time and space complexity optimization
- Documented code with detailed explanations of approach, complexity analysis, and edge case handling

## EDUCATION

---

### Red & White Skill Education Official

2024 – 2026

*Full Stack Web Development Program*

*Navsari, Gujarat*

### Arts, Commerce and Science Junior College

2022 – 2023

*High School Diploma, Science Stream*

*Satral, Gujarat*

## ADDITIONAL INFORMATION

---

**Learning Approach:** Believe in building strong fundamentals through consistent practice and learning in public

**Professional Development:** Regularly engage with developer communities, share progress on LinkedIn, and maintain active GitHub contributions

**Interests:** Problem-solving, clean code architecture, scalable system design, open-source contribution
